

CW Uninstall - Wiping a Computer Clean of *CapacityWare*TM

To totally **REMOVE** CapacityWare from a computer on which it has been previously installed:

Go to RUN.

Select "Regedit" and click OK

Open "HKEY_CURRENT_USER"

Open "Software"

Open "VB and VBA Program Settings"

Open "Microsoft"

There is a folder titled CW with two subfolders (Options and Settings)

Right click on the "CW" folder and select "Delete"

THEN, if reinstallation is warranted, proceed...

Proceed with an Install Routine as normal.

Call for a new Registration Key.

Verify the new install is working.
